Quality Policy

The basic orientation of iPHASE technologies is to be recognized for the quality in manufacturing of cutting-edge automation solutions in the field of Nuclear Medicine.

This will be achieved through:

- Consideration of context of the organization and aligning the Quality Management System with the strategic direction of iPHASE technologies
- Satisfying customer and applicable statutory and regulatory requirements
- Management of organization, along with employee-established quality objectives and defined responsibilities for their fulfillment
- Establishing, applying, maintaining and continual improvement of effectiveness of Quality Management System – ISO 9001:2015
- Continual enhancement of customers' satisfaction
- Tracking and applying new technologies and educating employees
- Careful selection of suppliers
- Commitment to increasing the quality of products and services to exceed customers' expectations
- Making continuous improvements apart of our day-to-day work
- Ensuring that our Policy and Procedure Manuals reflect in our performance
- Continuously upgrading the Quality Management System in all stages ranging from design and development to activities after shipment of the products. The framework for setting quality objectives is defined in the Quality Manual.

The Quality Manager is responsible for communicating the Quality Policy to all people working for or on behalf of iPHASE technologies and making it available to the public.
